ART CATALOGUE

# ARTIST BIO

*Pic by Polina Laamanen*

Veera Vartiainen's (alias VV-machine, born 1990) artistic practice ranges from digital art to using recycled materials. Her work consists of surreal vector based imagery, merging digital with analog and researching the technical possibilities for sustainable creative processes. After a decade working and living abroad, VV-machine's art delves into how different perspectives shape our understanding of the combination of emotion and technology. As a visual artist, she has seen firsthand how cultural and conceptual differences influence the way technology affects us on an emotional level.

Since returning to Finland, she's focused on her surreal "Vector Meditation" series and festival installations. Her commissions include label illustrations for Fat Lizard Brewing Company, site-specific works for Purkutaide 2025 and Kosmos Festival (2023–2025), a large installation for Solstice Festival 2024, and illustrations for Visio Festival 2022. In 2023, she was chosen for the Kunsthaut Jägermeister Art Residency and is curating the Kosmos Festival 2025 gallery. Her work has been showcased in solo and group exhibitions across Finland and Europe, supported by the Arts Promotion Centre Finland (Taika) and the City of Helsinki.

# VECTOR MEDITATION

“Vector Meditation” springs from a surreal, ever-evolving imagery that unfolds across multiple series’, each grounded in six primary artworks that serve as core points. The series employs a pop art-influenced process of replicating designs in various colors, sizes, and materials, enabled by vector technology, merging digital methods with recycled materials. By contrasting harmony and chaos, “Vector Meditation” reveals the intimate and infinite layers of our shared subliminal reality.
